

APTHA H P

apthagowda258@gmail.com | +91 8310694903 | Bengaluru, Karnataka, India | linkedin.com/in/aptha-h-p

PROFESSIONAL SUMMARY

B.E. in Information Science with hands-on experience in data science, machine learning, cloud computing, Linux, networking, Python, and SQL. Passionate about building AI-enabled solutions and seeking an entry-level opportunity to apply technical skills in scalable, real-world intelligent systems.

SKILLS

Technical: Python, Machine Learning, AI, Data Science, NLP, Audio Analysis, Cloud Computing (AWS), SQL, Java, Linux, Flask, Twilio API, MediaPipe
Tools & Platforms: VS Code, GitHub, Jupyter Notebook, Google Colab, Postman, MySQL Workbench, AWS Console
Professional: Problem-Solving, Team Collaboration, Communication, Time Management, Quick Learner

EXPERIENCE

Intern - Data Science & Machine Learning | IIMSTC, Bengaluru Feb 2026 – May 2026

- Performed data analysis and built machine learning models using Python to solve real-world problems.
- Applied statistical and ML techniques to real-world datasets, translating academic knowledge into actionable solutions.

Python Development Intern | Cognifyz Technologies, Remote Aug 2025 – Oct 2025

- Worked on Python programming concepts and hands-on projects, strengthening problem-solving and coding skills.

PROJECTS

Human Scream Detection & Analysis for Crime Reduction
Tech: Python | Machine Learning | Audio Analysis | Twilio API | Location Services

- Built a real-time audio monitoring system classifying scream risk as Low, Medium, or High using ML models trained on audio features.
- Integrated Twilio API to send SMS alerts with incident location to nearby police stations or helplines based on detected risk level.

Gender Bias Detection in Job Descriptions
Tech: Python | Machine Learning | NLP | Text Classification

- Developed an ML-powered system to detect and flag gender-biased language in job descriptions, promoting inclusive hiring.
- Applied NLP techniques for text preprocessing and classification to identify biased terms and suggest neutral alternatives.

AI-Powered Fitness Assistant System
Tech: Python | AI | Machine Learning | MediaPipe | Pose Estimation | Voice Assistance

- Built a fitness coaching system using pose estimation to track body joints in real time and detect incorrect posture.
- Integrated voice assistance to guide users through exercises and deliver live feedback, improving workout accuracy.

CERTIFICATIONS

- Technology Job Simulation – Deloitte Australia (Forage)
- Python Developer Certification – Cognifyz Technologies
- The Fledgling Program – Infosys Springboard
- Data Analysis with Python – IBM

ACADEMIC ACTIVITIES

College Ambassador – Techfest IIT Bombay (29th Edition) May 2026

- Secured a rank under 17,000 and received a Certificate of Appreciation; enhanced communication, networking, and leadership skills.

Participant – EWIT Hackathon 2K24 | Bits N Bytes Technical Club, EWIT Jan 2024

- Gained hands-on experience in teamwork, problem-solving, and applying technical knowledge within time constraints.

EDUCATION

Bachelor of Engineering, Information Science | East West Institute of Technology, VTU, Bengaluru 2026

PU Science | Vagdevi PU College, Thirthahalli 2022
